

Sheetcast

The Evolution of Spreadsheets

Launch real web apps in minutes!

Save your organization time and money by creating your very own web apps using Excel.

Sheetcast—an innovative, patented add-in for Excel—converts your spreadsheets into real web applications.

If you can use Excel, you can use Sheetcast!

Publish instant web apps from your existing spreadsheets:

- Timesheet tracker and collector
- On-site quoting system
- Real-time interactive reports generator
- Task coordination system
- Intranet document manager
- RSVP tracker for social events
- ERP (enterprise resource planning) tool
- Financial forecaster
- Client portal
- Field data collector
- Project management system
- Online survey
- Accounting system
- CRM (customer relationship management) dashboard
- And that's just the beginning!

The possibilities are infinite!
